1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 34-63 and 67-69 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The recitation "a stack-of-articles support to be filled with a row of articles... and to fix a press-in stack of articles without a magazine", found in lines 11-13 of claim 34, is unclear with respect to the function performed by the support.

The recitation "said stack-of-articles support having one of a lower or upper individual article ejector, which is displaceable in a transverse direction of the stack of articles", found in lines 16-17 of claim 34, is unclear with respect to the features possessed by the support and with respect to the direction the article ejectors are displaceable in.

The recitation "said holding-up device individually pushing a topmost article...to reach a selected article shaft either under the force of gravity or by said upper individual article ejector", found in lines 20-23 of claim 34, is unclear with respect to the pushing function performed by the holding-up device.

The recitation "an article-handling unit, which is movable... and removes articles... and transports articles... from an acceptance region, or from and to a supply

bay", found in lines 3-5 of claim 38, is unclear with respect to the transporting function performed by the article-handling unit.

The recitation "said longitudinal stack-of-articles clamping plate presses... a stack of articles...in a transverse direction of the stack", found in lines 6-8 of claim 39, is unclear with respect to the pressing function performed by the clamping plate.

The recitation "a stack-of-articles stacker plate, which has a shape of a part of at least one bay level", found in lines 2-3 of claim 43, is unclear with respect to the shape of the stacker plate.

The recitation "said bay-storage and retrieval unit being displaceable for taking over an article by movement to the stack-of-articles stacker plate via a rail or guide system", found in lines 4-5 of claim 43, is unclear with respect to the function performed by the storage and retrieval unit and with respect to the structure along which the unit moves.

The recitation "said angle sheet irons are doubly sloped", found in the second line of claim 48, is unclear with respect to the shape of the irons.

The recitation "said stack of articles picked up in the chute has a longitudinal fixing aid", found in the second line of claim 50, is unclear with respect to how a stack can possess a fixing aid.

The recitation "the supply bay is a double bay, which is arranged back to back", found in the second line of claim 54, is unclear with respect to the arrangement of the supply bay.

The recitation "said transverse rail is rigidly or telescopically fastened on a vertically displaceable lifting carriage", found in lines 4-5 of claim 58, is unclear with respect to how the rail is fastened on the lifting carriage.

The recitation "a plurality of stacks of articles can be conveyed...from a buffer or from the stack-of-articles pick-up", found in lines 5-7 of claim 59, is unclear with respect to the way in which the stacks are conveyed.

The recitation "said vertically adjustable article bay loading unit includes a gripping unit or stack-of-articles support", found in lines 10-11 of claim 59, is unclear with respect to the features which the loading unit possesses.

The recitation "a support for holding a stack of the articles with a longitudinal axis in a predominately vertical direction", found in lines 8-10 of claim 67, is unclear with respect to how the support holds a stack. Which entity, the support or the stack, possesses the claimed longitudinal axis?

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

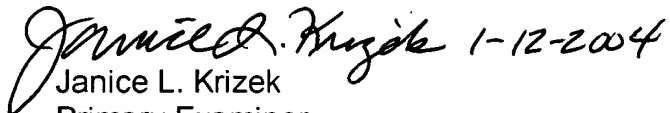

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

4. Claims 34-63 and 67-69 are rejected under 35 U.S.C. 102(a) as being anticipated by Neukam (EP 0 795 495).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Examiner Janice Krizek whose telephone number is (703) 308-2026. The examiner can normally be reached on Mondays through Fridays from 11:30 a.m. to 8:00 p.m.
